

"My goal as an educator is to make the process of learning gratifying, interesting, and helpful to the students. I also believe that the ability to self-study is the most crucial skill that the students need to attain in order to internalize learning and turn it into a lifelong passion. By guiding the students to achieve one small win at a time, I hope to build up their confidence and ignite the passion for knowledge acquisition in general."

DUONG NGUYEN

Math Teacher

Teaching since 2015

Math all levels;
Test Prep.

Success cases

Ngo Lam Thy, one of Duong's students, got 7 on a Stanine scale (1-9) in her Math entrance exam to an Australian high school that she ended up going to.

Duong is highly trusted by parents as most of his private tutoring classes are long-term (5 out of his current 7 students have been with him for at least 1 year).
