

*"I see test preparation more than just score improvement. It is a process of academic review, self-awareness of strengths and weaknesses, identification of solutions and active execution. The process requires students to walk through rigorous steps. In this way, test prep teachers serve more like coaches and their final products with students are not only significant score increase but also students' character development."*

## **HIEU NGUYEN (LEO)**

### **Test-prep Teacher**

Teaching since 2014
