

"I believe teaching is not only about delivering knowledge but also creating motivation to learn. My goal as a math teacher is to make math relevant to real life by integrating hands-on activities in every unit in order to make children active learners, to let them see how beautiful math is and how they can apply math in their daily lives."

LAN NGUYEN

Math Teacher

Teaching since 2015

Certificates

Bachelor of Science in Finance and Banking;
CFA exam level I in June 2012.

Qualified to teach

Math up to Summit.

Success Cases

Lan has strong reputation for being able to show young students how to have a love for learning math, even when it's difficult.

Crystal, who was getting a B/C before, got an A after 5 weeks studying with her.
