

"Teaching doesn't mean to provide students the answers of any questions; it is the way in which teachers accompany with students by giving them the guidance, inspiration and motivation. My goal as a teacher is to help students enjoy learning, figure out the lessons themselves and explore their potentials. Besides, after leaving the classroom, students will be more confident and passionate to follow their way leading to success."

OANH TRAN

Math Teacher

Teaching since 2015

Certificates

B.A in International Business, Hanoi Foreign Trade University;
