

"I believe that Teachers are the guiders and facilitators, not transfers, of knowledge. My goal as a Math teacher is to motivate students to actively examine, extend their thinking and thus maximize their learning. By understand the insight of students' obstacles to learning, especially in Math, I aim to make Math interesting, make Math possible and make Math relevant to my students, thus motivating and engaging them with excitement and belief that Math is fun and easy to handle, by not telling students what to do, but instead to show them HOW to do it and WHY should they do it."

PANG TRAN

Math Teacher

Teaching since 2015,

Started working at Ernst & Young, then moved to advertising companies namely Cheil Worldwide and Grey Global Group; and worked as Marketing role in Fonterra Brands Vietnam.

Certificates

Bachelor of Science in Finance, Latrobe University in Melbourne, Australia.

Qualified to teach

Math all levels.

Success Cases

Pang Tran cares about a child intellectual development in the long term rather than a simple improvement in school grade or short term performance. She always seeks for new ideas to construct creative lesson materials and class planning.

- She contributed to Tô Việt Hoàng's improvement in Math analytical and solving skills to achieve his goals in a limited time.
- She successfully inspires kids who are not interested in math at all and guide them with detail personal and educational development plan.
