

*"To me, teaching is about taking on a journey of knowledge together. And during that journey, the student should be in the driver seat as many times as possible. In my class, instead of sitting at one place and trying to perceive what is being presented, students can move around, build the lessons alongside the teacher and participate in different activities to fortify what they have just learned. They are also to be guided and inspired to find the right questions, which is an important skill that will help with any other learning experience that they might have at school or in life."*

## **TRUNG PHAM**

### **English Teacher**

Teaching since 2016 with previous tutoring experience since 2013.
