

"I am a firm believer in self-discovery as the best tool to mastering an idea. In order to facilitate this, I like to present students with challenges and ask questions designed to make them think in depth about a problem. This kind of learning grants the learner a greater amount of satisfaction and results in a more insightful understanding of a concept."

JAY DIENN

Math Teacher

Teaching since 2011

Certificates

PGCE - Primary Education - St Mary's University College;

BSc - Biology - University of Nottingham;

TEFL (120 hours) certificate - BASE English;

Qualified to teach

Math up to M9000

Success Cases

Throughout my 4 years as a Primary School teacher in London, I have taken great pride in being an integral part of my students' learning journey and to witness them mature into confident young adults. Preparation for the end of KS2 National Curriculum tests in Math, English and Science is synonymous with the final year of school and can be daunting but year after year we have shown that hard work and perseverance produces results that we can be really proud of.
