

“My teaching philosophy is to assist students to develop a deep understanding of the material which will allow them to easily solve difficult problems as well as create a strong foundation to build upon for their future studies. I love to help students explore the "why question" and guide them to gaining the understanding for themselves.”

BAIN JU-ERN MESHAK

VIP Teacher

Teaching since 2013

Certificates

BSc. in Engineering - The University Of Melbourne

Masters in Engineering - Mechatronics

Success Cases

Greg studied with Meshak for 20 hours after his parents were worried about his math. Greg was getting Grade 3 in IB math and had really lost confidence in his ability to do math. Greg tried to avoid maths as much as possible, even in simple calculations used in daily life, because he thought 'I can't do math' 'I can't get it right'. Over the course of the 20 hours Greg slowly gained confidence and by the end of the 20 hours Greg managed to get a Grad 4 in IB math which was really good and he realised that he can do math. Their ongoing goal is to get grade 5-6 in IB math.
